

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

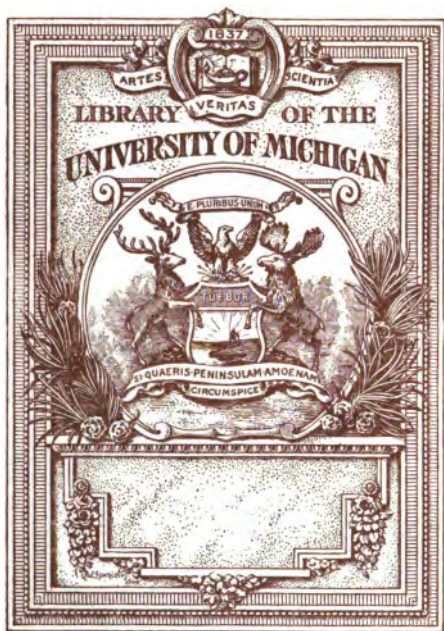

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

THE
Mnemonic Similiad.

INTRODUCTION.

In constructing the MNEMONIC SIMILIAD I have endeavored to introduce a scheme for aiding the memory in grasping and retaining in mind *groups* of remedies having a general indication *in common*.

To what extent I have succeeded must be determined by a *fair* trial, made by those who may feel disposed to test it.

The principle of association is a faculty *native* to the human mind, exercised in acquiring and retaining the various things stored up in the memory.

We may not at all times be aware of this or observe it, but, nevertheless, it is a spontaneous process in perpetual operation in our mental organism.

Therefore, there can be nothing more acceptable and agreeable to the rational mind than a well-constructed system of mnemonics; not because of its essential *reasonableness*, but because of its ready and adequate *suitableness* for the use to which it is applied.

It must be evident to anyone who considers the matter that there has been in the mind of the author a considerable degree of evolving of schemes before the most suitable should be forthcoming.

130023

I tried and abandoned one plan after another, and I was about ready to give up in despair when at last I hit upon the scheme set forth in this brochure.

The first thing that occurred to my mind was the *indication of letters*, but this did not cover all the ground.

The *personation of remedies* and introduction of personal acts and qualities, though evidently most requisite, was the last suggestion to my mind. When this came clearly into view, then the rest in complete arrangement came, rank and file, into becoming order, and lo! here you have it.

The introduction of *versification* is in keeping with the rest as a mnemonic scheme. Who has not been assisted in remembering the number of days in the months of the year by this familiar verse:

Thirty days hath September,
April, June and November;
All the rest have thirty-one,
Saving February alone,
To which we twenty-eight assign,
'Til Leap year gives it twenty-nine.

On this same principle it seemed to me that a ditty might be of use in memorizing the leading indications of our remedies. So, then, this is my apology for encroaching upon the realm of poesy

with my *SIMILIAD*. I beg the pardon of all the Muses of pathetic and sentimental song for introducing upon the rhythmic stage my plain domestic Muse, whose cognomen is *USE*. She is, indeed, plain and simple, but withal a most sincere and honest dame.

EXPLANATION OF THE PLAN OF LETTER INDICATIONS.

(Vowels do not indicate, nor letters in words necessary for the construction of a sentence, as in the words an, the, he, she, it, him, her, them, and, or, for, from, with, in, on, to, be, at.)

1. There are two orders of indications and each single consonant has two indications. See illustrations under A (1).

2. Double consonants have the same indication in each order. See illustration under B (2).

3. Single consonants *repeated* in a word or sentence indicate a remedy in each order. See illustrations under C (3).

4. Only consonants indicate, and only those in the *first syllable* of a word indicate. See illustrations under D (4).

5. Y at the beginning of a word or following a vowel indicates, not otherwise. See illustrations under E (5).

6. Words of the first order begin with a consonant, and never end in *ing*, *ful* or *less*. See illustrations under F (6).

7. Words of the second order begin with a vowel, or, beginning with a consonant, end with *ing*, *ful* or *less*.

ALUMINA.

ALU. (2d W—Clay.) ALFRED.

Alumina affects the spine,
And hence (a paralytic sign).
The heavy, weary weight he feels
Adown his legs, with soft, numb heels.

All, all is dryness of his kin,
All DRY AND ITCHING IS HIS SKIN,
And dry the mucous tract within.
And hence his knotty stools delay,
Hence dry and sore his nose alway,
And dry his face, and tightly drawn

As from the white of egg dried on.
 Yea, dry his throat and bronchial track,
 From whence his morning hawking hack.
 And with it in his throat a pricking,
 As if from pin or splinter sticking.

A burning soreness marks these states,
 Which cooling water mitigates.
 A dizziness affects his head,
 That causes forward falling dread.
 Strange freaks of taste his longings mock,
 As CRAVING PENCILS, RAGS OR CHALK.

Of vegetable victuals, he
 Finds out *potatoes disagree*.
 Whilst salt, and pepper, and hot spices,
 A tantalizing cough entices.

And Cough with phlegm of pearly hue.

ARGENTUM NITRICUM.

ARG. N. (2d J) . THE KNIGHT.

Argentum Nitricum—We name
 Degeneration as thy name
 The tissues all from head to heel
 Thy wasting ravages reveal,
 The brain, the spine, the membrane track
 Give evidence of thy attack.
 Thy memory shirks, and leaves a state
 Of hasty feeling, as if late.
 The brain feels large, and giddiness
 To tottery trembling adds distress.
 THE HEAD WITH BURSTING PAIN IS SEIZED,
 WHICH MAY, BY BANDAGE TIGHT, BE EASED.
 Thy eyes are clogged with pus or phlegm,
 With constant need of wiping them.
 Thy canthi look like raw beefsteak,
 The cornea the while opaque.
 The iris sensitive to light,
 Whilst serpent forms beset the sight.
 Thy Nose on dire catarrh intent,
 Discharges mucus purulent.
 The Face is shrunken, pale or blue,

Or holds chlorosis up to view.
 The mouth emits an odor vile,
 The tongue is red-tipped, typhoid style.
 The Throat in which tough mucus sticks,
 Is pained with sense of splinter pricks.
 The which with hawking may denote
 A clue to clergyman's sore throat.

The chest feels tight, as if incased
 By tensive cordage round the waist.
 And hence for asthma comes a clue,
 And so for emphysema, too.
 The lungs are sore, and there is cough
 That raising of the voice sets off.

The stomach foul, with wind replete,
 Is ever CRAVING SOMETHING SWEET.
 And suffering with catarrh, and fret
 Of ulceration, is beset.
 And sometimes horrid torture feels,
 Especially after taking meals.
 The wind impacted causes pain,
 'Til *belching loud removes* the strain.
 The action of the heart may be
 Disturbed by gastric sympathy.

The stools are noisy, fetid, green,
 Or as in dysentery seen.

Or as in phthisis purging, too,
When drinks of water go right through.

The skin is subject to attack
Of small eruptions, blue or black.
Chorea, spasms, tendon leap
Arousing patient out of sleep,
With nervous trembling, all give sign
Of irritation of the spine.

The urinary organs show
A dribbling paralytic flow.
There may be wetting of the bed,
Or burning when the stream is shed.

The genitals in such condition,
As causes pain when in coition.
Venereal taint may be the canker,
Foul gonorrhœa, or a chancre.

All ailments strengthen in their might,
From walking, eating, and at night.

BELLADONNA.

BELL.

(1st B.)

BELLE.

Belladonna—deadly bane—
 Stabs the nerve with sudden pain.
 Pains that shift from place to place,
 Showing redness in its trace.

Redness smooth, or spread in rays,
 Points her migratory blaze.

Hence, *smooth* scarlatina, yes,
 And *smooth* erysipelas

Mark her type—and so the same
 Every *itis* we can name

Is *smooth red*, with pains that are
 Worse from every slightest jar.

Fever hers, in early stages,
 When a wild DELIRIUM rages,
 Starting in the sleep at night,
 Dizziness that dims the sight.

Red and painful is her eye,
 Sensitive to light—and dry ;
 Quivering objects meet her view,
 Fiery, and inverted, too.

QUINSY hers, and shifting mumps,

When into the brain it jumps.
 Whooping-cough, and cough defined,
 Of a dry and barking kind.

Spasms roused by every pain,
 And by drink renewed again.
 Mark her use in rabies plain.
 Stools are hers of bloody stain,
 Vomiting with horrid pain.

Falling womb, with downward pack,
 After-pains of keen attack.

Bryonia,—Voices this refrain—

“ All **MOTION** AGGRAVATES MY PAIN,
And when in ease, I would abide,
I lie upon the painful side.

A stitch, and sense of tightness, show
Where e'er my indications go.”

But don't forget, I do my best,
In ailments of the joints, and chest,
My joints rheumatic, swollen, ache,
An easy breath I cannot take,
Because a stitch arrests by breath,
Or **STITCHING COUGH**, that threatens death.

A vertigo affects my head,
And faintness when I rise in bed.
My Face is puffy, red—A glow
Of red upon my cheek bones show.

In the SUPPURATIVE STAGE.

 Swollen is the upper lip,
Mouth replete with angry ulcers,
 Teeth ache from cold water sip.

 Like a splinter, or a plug ;
And thy tender stomach suffers,
 When the clothes fit close and snug.

Appetite that craveth acids,
 Abdomen distended tight ;
Stools, though soft, of tardy passage,

 Or stay of *power* to walk or stand,
 Or hold excrements in command.

The pains that follow in the wake
 Of amputation, or betake

 As of a NAIL THERE DRIVEN IN.

Thine, too, an ague chill, that may
 To warmth of cover yield the sway.

A falling of the rectum, which is
 Attended with deep rectal stitches.

Neuralgic pain, of head and chest,
 And cough that teasing, gives no rest.
 A soreness of the throat relieved
 By food in gulping act, received.

MERCURIUS SOL.

MER. (1st M.) MERCHANT.

Mercury,—Thou ghoul of night!
 Ulceration thy delight.
Fetid breath, and salivation,
 Thy unfailing indication.
 Thine a flurried mind and speech,
 Memory failing in her reach.
 Head in motion, side to side,
 Aching as in cordage tied,
 Scalp in foul eruption's clutch,
 Sore and painful to the touch.
 Eyes in suppurating plight,
 Dim of vision, dreading light.
 Nostrils sore, that dripping keep,
 Epistaxis during sleep.

Face of pale and earthly cast,
Jaw by spasm tightened fast.
Mouth with ulcers sorely set,
Slobber, making pillow wet.
BLEEDING GUMS, and teeth all black,
Toothache nightly in attack.
Tongue raw, red, or white, presented,
Flabby, and by teeth indented.
Throat beset with inflammation
Leading on to suppuration.
When the drink in swallowing goes
Up and outward through the nose.
Rawness in the tracheal track,
Cough with stitches in the back.
Palpitation of the heart,
From exertion prone to start.
Abdomen distended, hard,
Sore when pressed upon, or jarred.
Stools of mucus—bloody—green,
Leagued with shudders in between.
Or with straining—“ne’er get through,”
Sometimes bringing worms to view.
Urine flow in frequent calls,
Burning in the channel walls.
Gonorrhœa, green or white,
Always running more at night.

Wife, with leucorrhœa green,
 Rawness of the parts within,
 With distressful itching turns,
 That from rubbing smarts and burns.
 Which cold water laving may
 For a little while allay.
 And whose breasts a soreness show,
 Just before the menstrual flow.

Glands where'er their situation,
 In a state of inflammation.
 Bones, too, in a similar plight,
 Always aching more at night.
 Bleeding ulcers—white within,
 Nightly itching, mar the skin.

Thine are trembling hands and feet,
 With a weariness complete.
Clammy sweats, that nightly drain,
 Giving clothes a yellow stain.

No relief from perspiration,
 Nay,—but rather aggravation.
 All is WORSE AT NIGHT, as said,
 Worse at night when warm in bed.

The Merchant,—Has *pains worse at night*.

MEZ. (2d M.) MISER.

Mezereum,—Thee we see
 Close of kin to Mercury.
 All thy ailments worse at night,
 All thy bones in tender plight,
 SCALP WITH LEATHERY CRUST O'ER-
 SPREAD,
 Or with dandruff thick inlaid.
 Skin on which hard crusts abound,
 Ulcers edged with pimples round.
 Scabs and scales that itch and bleed,
 Bloody urine—yea, indeed.
 Every skin and gland complaint,
 Showing syphilitic taint.
 RANULA to this we add,
 And a mind dispondent—sad.

CHEWING IN THY SLEEP at night,

Passing feces, too, perhaps;

Sometimes sinking in collapse.

Venturing to take a seat,

In *extremes* of cold and heat.

Nervous palpitation plays

Leading part in all thy ways:

With thy ONE HAND AND ONE CHEEK

PALE AND COLD—a nervous freak—

Worse thou art when out of doors,
Better in-doors, walking floors.

Is the fever of thy show.
Loud thy MOANING, with distress,
Sinking in unconsciousness.
With thy JAW DOWN, as in death,
Cankered mouth, and putrid breath,
Heavy tongue, of bluish cast,
Spots of white upon it massed,
Swollen throat of purple hue,
Having patches on it, too.

Stomach feeling empty—"gone"—
 Not relieved by eating—long.
 Stools that unrestricted go
 When the urine starts to flow.
 Purple piles of soreness, such
 As repels the slightest touch.
 Putrid ulcers on the skin,
 Foul discharges from within.

 Eyes, ears, abdomen and soles.
 Yellow blotches mar the face,
 RINGS OF BLUE THE EYES EMBRACE.
 Constant hunger—gnawing pain,
 Freight her Indigestion train.
 Cough with sputum yellow—green—
 Hers, where chest catarrh is seen.
 Headache in the summer heats,
 Toothache after eating meats,
 Urine strong, as if its source
 Were the kidney of a horse.
 Worse before a thunder storm,
 And when moon in full orb form.

NATRUM MUR.

NAT. M. (2d N—Salt.) NATHAN.

Natrum mur.,—Without a doubt

Thou art China's equal,

When malaria is about,

Or it's lurking sequel.

BLISTERS ROUND THY MOUTH, and in,

Itching blotch and tetter,

With a dry or shining skin,

Show thy *scurvy* fetter.

Violent thy fever thirst,

In the heat of ague,

When thy head would seem to burst,

Worse if cough assay, too.

Weak thy limbs, and muscles slack,

Heart beats intermitting,

Backache, better on the back

Lying—not when sitting.

Sore thy red and mattery eyes,

Giving out by using ;

Fogs before thy sight arise,

Letters blend confusing.

'Neath thy lids are sandy grains,
 Scraping in the morning ;
 In the morning ague trains
 Due at 10—give warning.

Flushed and pale thy urine pools,
 Oft by coughing starting ;
 Constipated are thy stools,
 Anus fissured smarting.

Yet in children thou wilt check
 Diarrhœa—dozy,
 With emaciated neck,
 And a *left* cheek rosy.

Melancholic is thy mind,
 Worse by constipation ;
 Suffering when in heat confined,
 Food gives aggravation.

STRONG THY APPETITE FOR SALT,
 Bread and coffee fending ;
 Heartburn, gnaws thy gastric vault,
 Water brash attending.

NITRIC ACID.

NIT. A. (Night—Dark.) NICK.

Nitric acid,—Thou the genius
To corrode with ulcer sore.

PAINING AS FROM SPLINTER STICKING,
Skin and bone and mucus floor.

Thine the syphilitic lesion,
Condyloma—pimple—wart.
And a purulent ophthalmia,
Of a syphilitic sort.

With a cornea ulcerated,
And a mouth of odor foul;
Rising from an ulceration
That may reach to throat and bowel.

Thine a cracking jaw when chewing,
Headache as from vise-like band;
And a cough with yellow sputum
And enlargement of the gland.

Stitching pains invade thy stomach,
Tender oft thy abdomen.
Hard thy stools sometimes, and painful,
Smarting burns thy anus then.

Stitches dart in thy urethra,
Strong thy urine in its scent,
 Like that of a horse's urine,
 Sometimes *feeling cold* to vent.

Chancres, with offensive moisture,
 On the genitals are seen ;
 Whilst thy wife has, as her ailing,
 Leucorrhœa foul and green.

Night sweat is a frequent symptom,
 Mostly every other night ;
 Also cramp in calf occurring
 Often putting sleep to flight.

Thine a state of sheer exhaustion,
 As if from dyspepsia ill ;
 Tended with a morbid craving,
 For things indigestible.

Or perhaps a hungry longing
 For fat food, or herring smoked.
 Whilst perhaps there be aversion,
 To all bread and meat evoked.

Better thou when in a carriage
 Riding out thy friends to greet.
 Worse at night, and worse on waking,
 Worse on rising from a seat.

That show affection of the spine—
Paralysis, neuralgia, cramp,
And ailments of spasmodic stamp.
While NUMBNESS over all prevails,
With blueness of the skin and nails.

Aboard thy gastro-entail train,
Are colic, nausea, gastric pain,
And sour belching, stowed among
Foul morning taste, and blistered tongue,
And dryness of the mucous aisles,
And CONSTIPATED BOWELS, and piles.

With flowing nose, and ringing ears,
A burning in the eyes appears,
And also dimness of the sight,
With over-sensitiveness to light.

Whilst these *thy* ills—Thy wife com-
plains
Of falling womb, and lumbar pains,
And menses paying off their dues
Both in advance, and too profuse.

And during labor, pains so spent
They fail the after-birth to vent.

From slight annoyance getting mad.
And after going on a “spree,”
Delirium tremens haunteth thee.

 Save in sweat, which we behold,
 Quite profuse, with forehead cold.
 Thine a STUPOR, breathing slow,
 With a face of ruddy glow.
 Burning eyes, and pupils small,
 As in APOPLECTIC thrall.

As an oven hot, thy bed,
 Vertigo betides thy head,
 Though long vigils thou shouldst keep,
 Yet thou art deprived of sleep.

From thy bowels all drain may stop,
 Or perhaps unnoticed drop.
 Stools be moulded into balls,
 Pressing pain attend the calls.
 Pressure toward the groin extending,
 As if hernia impending.

To be worse thy ills incline,
 After sleep, and warmth, and wine.

 Consumption may result therefrom.

 Then loose and slimy is thy stool.
 Or if a *dysenteric* kind,
 With pain and vomiting combined.

Thy stomach shows derangements that
 Produce intolerance to fat.

Thy mouth o'erflows with watery slime,
 Producing nausea all the time.
 There's NAUSEA, too, from taking trip
 IN CAR OR CARRIAGE, BOAT OR SHIP.

Thou hast a DRY and FISSURED SKIN,
 And itching fetid moisture in
 The arm-pits and upon the feet,
 And at the privates in retreat.

A tender coccyx marks thy plagues,
 And moist eruptions on thy legs.

THY FINGER ENDS ARE DRY AND CRACKED,
And hands with salt-rheum are attacked.

In Typhoid—*double*, seems some part,
Or like *a cold stone seems the heart*.

PHOSPHORUS.

PHO.

(2d P.)

PHILIP.

Phosphorus,—Thy pleading tongue,
 Speaks of soreness in the lung.
 And of tightness in the chest,
 With PNEUMONIA in attest.
 Asthma, hoarseness, loss of voice,
 Cough, and croup thy primal choice.
 Loss of blood, and bloody slime,
 Sounds thy key-note every time.
 Blood and water on the brain,
 Bloody perspiration stain,
 Bloody ulcer, bloody stool,
 Bloody sputum, bloody drool.

Oft thy ills show indication
 Of a spinal irritation ;
 Such as tremor, petit mal,
 Nervous spells hysterical,
 Brain exhaustion, paresis,
 Failing vision, caused by this,
 To which enervating sway
 He may add ataxia.

Death-door state may mark thy hold,
 Drenching perspiration cold,
 Night, and early morning sweat,
 As in phthisis ever met.

Pains neuralgic on the scout,
 Pains rheumatic—pains of gout.
 Also pains that numbing come
 In the periosteum ;
 With destructive purpose shown,
 By a caries of the bone.

On thy skin we see deployed
 Measles, shingles, varioloid.

Thou hast vagaries of mind,
 Of a melancholic kind,
 Or clairvoyance, or a sway
 Of erotomania.

Sleeplessness, or in thy sleep
 Some SOMNAMBULISTIC FREAK.

These thy idiocyncrasies—
 After sleep a sense of ease,
 In the night a hunger tease ;

Cold must be thy food and drink,
 From all sweets thou needs must shrink.

PHEBE.

Phosphoric acid,—Much the same,
 As Phosphorus we find thy claim ;
 Presenting mental gloom intense,
 Or unconcerned indifference,
 As in prostration may be found
 Inrooted in a typhoid ground.

Thy tongue is bitten unaware,
 Thy stool entraps thee in a snare.
 Thou hast a hunger in the night,
 Thy stools and urine both are white,
 Too oft thy calls to urinate,
 That DIABETES indicate.

Lewd dreams thou hast — and WIND
 EMISSION

FROM OUT THE WOMB, in lax condition.

Thy ears are deafened by a roar,
 Thy skull bones feeling tender—sore—
 While low down tickling cough declares,
 How much like Phosphorus thy cares.

Type malignant as we note—

DIPHTHERITIC, or per chance

Scarlatinal in advance,

Or from syphilitic fire,

Mersed in ulceration dire,

When on swallowing appears.

Pain in root of tongue, and ears,

Or as meet attendant whim

Aching in the back and limb.

Pain along the bones at night,

Is thy customary plight.

Foul eruptions on the skin,

Ulceration out and in.

Even cancer taking flight

From the presence of thy might.

Thou of all our agents best
 For INFLAMED AND GATHERED BREAST,
 Or for breast pains that begin
 When the milk is flowing in,
 Or for lochia suppressed,
 Or a leucorrhœal guest.

 Phyto.—and the more, if, when

SILAS.

Silicea,—Thou elf of *pus* !
 Thou suppuration omnibus.
 There is no ulcer or decay,
 That indicateth not thy sway.
 Thick YELLOW MATTER is thy style,
 IN EVERY AVENUE and aisle.
 Thou taketh thy catarrhal seat,
 With purpose never to retreat.

Perpetual *coldness* is thy whim,
 And hardness is thy synonym.
 Thy head with coldness, truth to say,
 Hath need of wrappings all the day.
 Thy feet are icy cold—and back
 Is not exempted from attack.

Embedded in thy hardened soil—
 Lo! hard eruptions, gland and boil;
 And hardened Testes, and among
 Thy HARDENED TISSUES—hardened
 tongue.

 And nostrils filled with crusty scales.

 In scent of foot sweat—flatus—stool.
 A scrotum sore, and damp, and foul,
 A moist and fetid rectal bowel,
 An abdomen distended tense,
 Infilled with fetid flatulence.
 A stool that merged, slips back again,
 Or passed extrudes blind piles with pain.

Thy drinks of water soon come up
 From off thy stomach after sup.

Thou hast a state of gums all wrong,
 A feeling as of teeth too long,
 A headache rising from behind,
 With pains that may upset the mind,

Relieved by wrapping warm and tight.

A nervous starting as from fright.
Debility and flushing heat,
A trembling of the hands and feet.

For open cancer, thou doest beg,
For vaccine and diphtheria dreg,
And even cataract and brag
On closing sutures when they lag.
Thou calleth out, *Lascivious* sprite!
Night sweats, and spasms in the night.
And faileth not in toils to drag,
The faint heart down with mental fag.
'Til webs of vagary it spins
And toys with needles and with pins.

Whilst motion only brings to grief.

All the day how sad thy feelings,
How thy things of memory fade.

To thy head the blood congesting,
Causes heat and weight on top ;

Hammering pains and giddy whirlings,
That all locomotion stop.

Sore thy eyes—agglutinated,
Weak and sensitive to light,
Burning, itching, smarting, stitching ;
Balls in ulcerated plight.

In thy ears a painful stitching,
Roaring, ringing—hearing dull.
Whilst thy nose, sore, red and swollen,
Is of foul secretions full.

Flushed thy face, with heat and burning,
“ Black-heads ” clogging every pore ;
Upper lip and jaw-glands swollen,
And the chin with herpes sore.

Parched thy mouth, or full of water,
Viewed within shows blisters there ;
“ Bad ” thy taste in early morning,
Ache thy teeth in open air.

In thy throat a scraping, hawking,
Feeling like a rising ball ;

In the stomach, craving hunger,
Or no appetite at all.

Burning is a gastric symptom,
Nausea just preceding meals ;
Thirst for beer, among thy longings,
Milk distressing trouble deals.

In thy abdomen a soreness,
Stitching, griping, rumbling sound ;
Colic with a bending double,
Tensive fulness all around.

Dry thy stools, with piles protruding,
Burning anus after stool,
Or a morning diarrhœa
Urging, may assert the rule.

Calls to urinate are urgent,
In the night especially so,
With an itching in the channel,
Or a burning with the flow.

In the night thou hast emissions,
Passed in dreaming—uncontrolled,

And thou has a sweating scrotum,
Itching glans, and penis cold.

Whilst thy wife, hath "show" abnormal,
Too profuse, or short, or late ;
Burning itching leucorrhœa,
Mammæ in a flaming state.

Respiration short, when walking,
Rough, hoarse voice, or aphony ;
Weakness in the chest when talking,
Sprain-like pain, therein may be.

In the night asthmatic smothering,
Or a sleep disturbing "hack ;"
Cough with rawness in the bronchi,
Cough with stitches in the back.

Heart in state of palpitation,
Mostly in the night in bed ;
In the back a chilly crawling,
Stitching pain, or bruise instead.

Sweating from the least exertion,
Sweat profuse in sleep at night ;

Morning sweat, soon after waking,
 Ague—in a sinking plight.

Weakness, and emaciation,
 Bruise-like pains, or stitch, or cramp,
 Stiffness of the knees and ankles :—
 These the signet of thy stamp.

 Teeth decaying at the roots.

When a vertigo assails us,
 On the closing of our eyes ;
 And our body seeming brittle,
 Breakable by exercise.

When our sweat is fetid—sour,
 Flesh feels beaten from the bones ;
 And at night from heat of bedding,
 We are tortured into groans.
